## B. Program Installation

### Step 1: Import the Database

1. Open SQL Server Management Studio (SSMS).
2. Right-click on Databases → select Restore Database....
3. Under Source, choose Device → click Add.
4. Browse to the .bak file located in the “db” folder of the project.
5. Click OK to complete the database restore process.

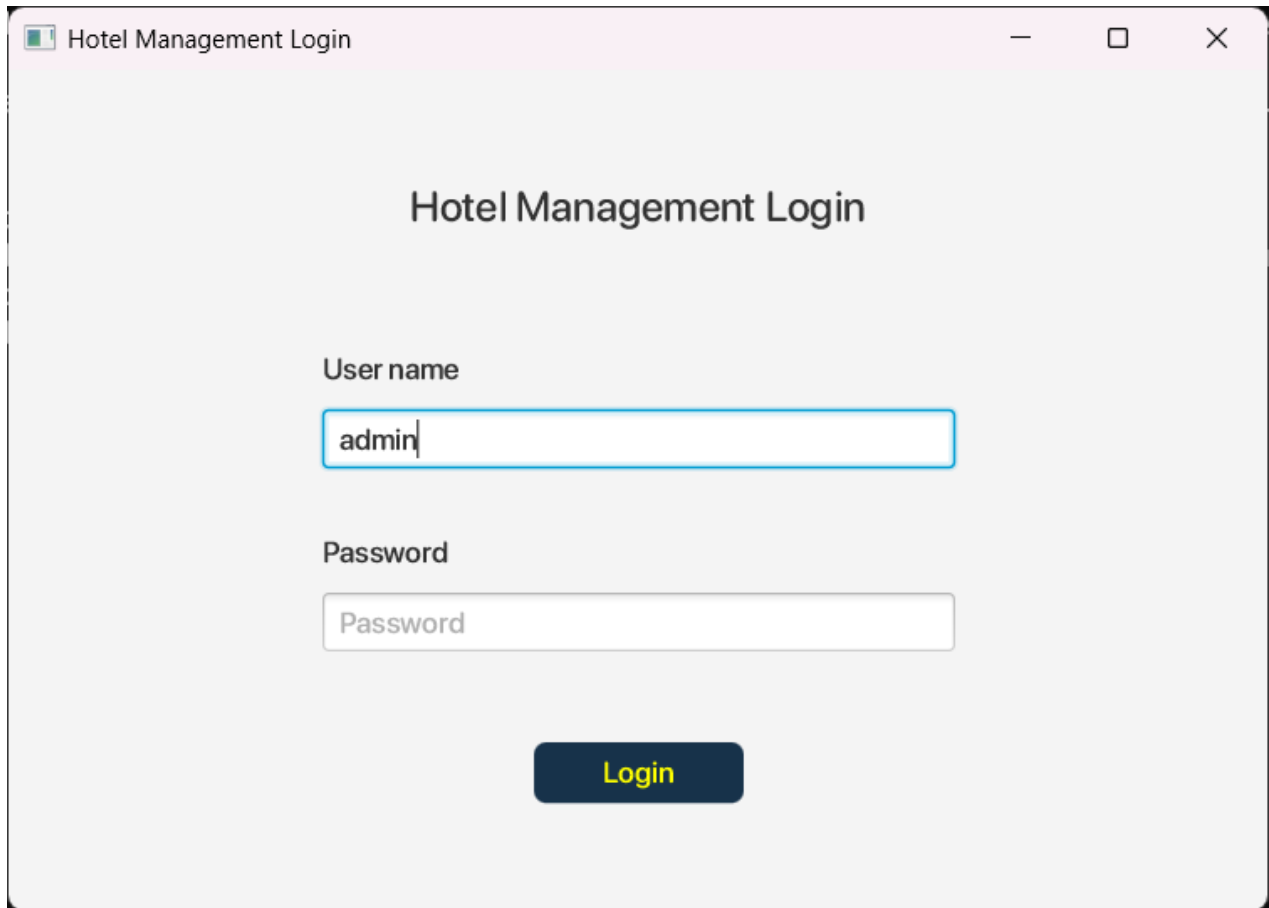

### Step 2: Run the Application

1. Open the project folder.
2. Run the application by executing the run.bat file  
OR manually run the command on terminal:

```
java -jar target/HotelManagementSystemFXML-1.0-SNAPSHOT.jar
```

- (\*)
- Installation documentation is included with the installation disc, should follow the proper format which have clear and complete content for anyone to perform.
  - The Center performs the installation and give a notification of the protection list for successfully. Project not successfully installed is Fail.

### C. Successful test

The screenshot shows a web browser window titled "Hotel Management Login". The page has a light gray background and a dark blue header bar. The title "Hotel Management Login" is centered in a large, bold, black font. Below the title, there are two input fields. The first field is labeled "User name" and contains the text "admin". The second field is labeled "Password" and contains the text "Password". Below the password field, there is a dark blue button with the word "Login" in yellow text.
